

July meeting – SID socket costs

Good morning Liz,

Thanks for your email.

We do not fund the SIDs themselves, however through the LHFIG process you are able to apply for a NAL socket and post as you have suggested below. This is a type of foundation which allows the user to remove the post (and any device) when required. You can see what these look like here: [Non-Illuminated Retention Systems for Post Installations | NAL](#)

I have attached the deployment best practice note, it is recommended that to maintain effectiveness they should be deployed on a temporary basis and normally be in place at a site for between 2 and 8 weeks and not redeployed until a minimum time of 4 weeks has elapsed.

Total cost is usually in the region of £1000, with 25% (£250) expected from the Parish Council depending on traffic management requirements. If you wished to proceed with this request, I would be grateful if you are able to fill out the attached Highway Improvement Form which will need to be submitted to LHFIGrequests@wiltshire.gov.uk by 22nd July for it to be discussed at the next LHFIG meeting on Tuesday 6th August.

I hope this helps, but please feel free to give me a call to discuss.

Kind regards,

Rhiann Surgenor BEng (Hons) GMICE
